

Mobile Friendly Controls

"Mobile friendly control" plugin transforms the radio and check boxes to a format that makes them easier to choose from a handheld device. In order to setup the Plugin, you would only need to apply it from the Plugins page for it to take effect. No other indications are required.

- The plugin is not compatible with **Rate Different Items Along The Scale of Your Choice**, **3D Matrix** and **Compare One Against Another** question types
- The plugin **has limitations** and does not allow to work with a large number of inputs in the **Safari browser**.
